Nothing from this release may be duplicated without written permission of the publisher.

Dear Reader,

Unfortunately was number 1 not spread at the same time.
But with this issue, we hope this happened.
Our apologize for that.

Also was by the first issue someone from the redaction present, which we had forgotten to notice and that's Alex Koedooder, also known as Koetje MSX.

He's the one who's responsible for the new layout, the translations and processing of the articles.

We won't give you only web information, but also some reports of hardware, software and some courses with explanations about several things.

You'll also find some advertisings, which might be interesting.

We also won't hide, that we are working on a Photo CD, from the previous Fairs, where we also by then asked permission at several Clubs, might we've forgotten you, then please let us know, because then we can put your photo shoots on the Photo CD. The best would be 600 bij 480mm or greater. There's also a Dvd of movies of these fairs.

Now has several meetings and fairs passed, like Bussum 2003, Oss 2004 en Tilburg 2004. We will add several pictures of these within the fair-reports in this magazine and the will be set on the Photo CD.

Which you can play with a CD/DVD-rom player, and there's also special for an archive file on the cd, so you can watch as well on your MSX, as on your Gfx 9000 card.

More info about you can find further in our magazine.
The CD will not be too expensive, so everyone can buy it, by us, by mail or on a fair, where from the first will be in Oss on 22 Januari 2005.

Now I wish much reading fun and who knows we meet you on our Homepage or on a Fair.

Rinus Stoker

DVD Report of Retro Game and Computerday in Maarsse

For everyone is there now on DVD a report been made about the Retro Game and Computerday in Maarsse, which was held on 19 juni 2004.

It's an impression over the whole day in 23 minutes and is packed in a very nice cover.

This DVD of the retro day in Maarsse is available for 7 Euro.

And plus 2 euro for administration costs on the complete value is 9 Euro.

If you are interested and prefer to receive these by postmail, then you can make over the ... of 9 euro on:

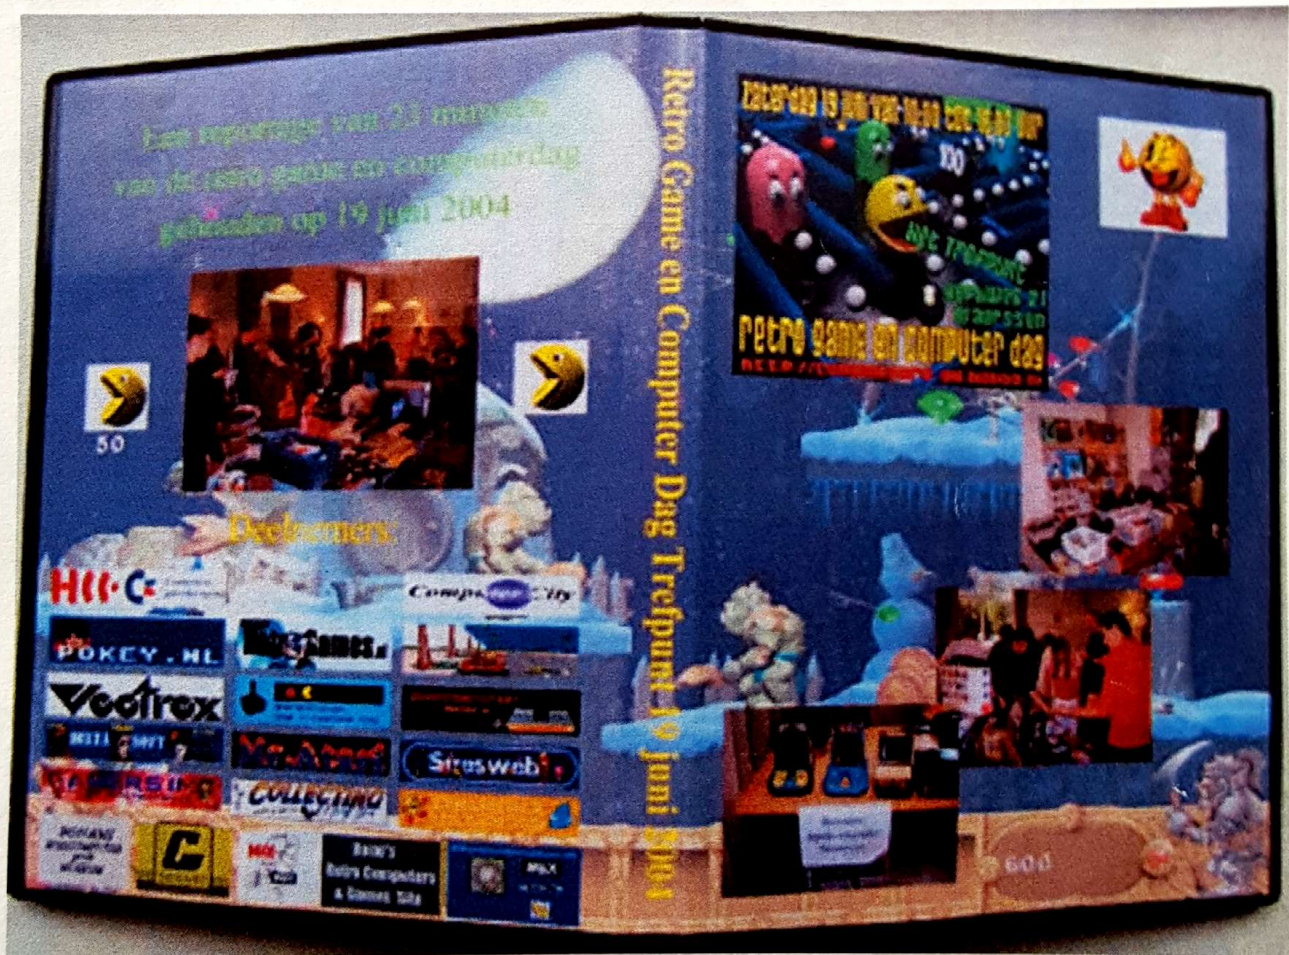

Girorekening 4135734

Tnv: Ron van Schaik
in Maarsse

under transcription of van Retrodag DVD.
Send Ron also a n e-mail with your name, adress and living place, so he knows where to he can send the DVD.

His email adress is:

r.van.schaik@kader.hobby.nl

Might you even don't know it yet, then you better can get yourself a pencil and agenda, to pay a visit to one of these unforgettable MSX events.

We've found for the upcoming 3 months, the following events.

As a little remark, might you've your own organised MSX Event or a Retro Meeting or however you want to describe it and it's MSX related, then you can always contact us. So we can put these events in our upcoming MSX Agenda's. Contact info can be found in the Colophon.

Interested in advertising in the next issue of MSX World Wide?

Or do you just want to leave your egg?

That's possible! MSX World Wide will offer in the next issue more space for eventual advertisings (promotional text and/or picture are possible) and there will also be a page for you, where you can leave your egg.

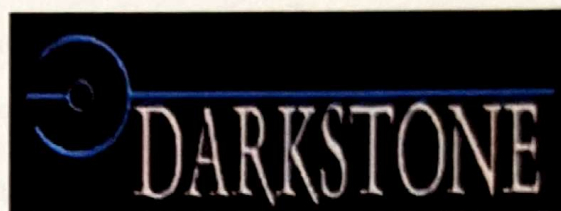

We also want to publice a list with websites in every issue, so if you have a website, send us the link and we'll take it up in our list of websites, for the next issue.

For more information, take up contact with mwwblad@home.nl

On the last minute we have received an copy by mail of the game Bounce Mania.

This game has already been released on the fair in Bussum 2004.

Unfortunately we weren't there, so here we go... Here's te report:

Upcoming fair in Oss on 22 januari 2005, shall this game again been sold by the MSX - Group, named "Darkstone".

After completing 11 stages , you'll receive a new password, forom you can continue your game.

The Game:

The game is completely in Basic and is also the first written program by Rudy Westerhof, but that will not damage the fun of the game, because I, who doesn't play games often, has a lot of fun by playing this game. Because it's also about the creativity.

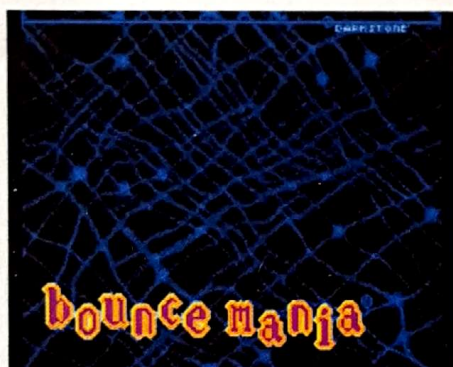

You must have a god self-control to use the cursors to lead the ball finally to it's destination.

The game works good under MSX Dos 1.

During the game:

We start up the computer and the game opens with the password "Yellow", which you can find on the label of the diskette.

Then we see a nice graphic screen with blockwalls, aball, through were we've to go, after bouncing and hobbling we finally managed to finish the first stage to a good end.

I didn't play out the game and to discuss everything is not that fun. Beacuse then you don't have to play it anymore.

Conclusion:

The game is worth it to come into your collection for only 5 euro. You can play the game on yourself and enjoy the creativity and the fun experience, which we joined too, during the game.

We also hope that this group will continue and that they may bring out many games in the near future.

This means also even for the first time of lot's of creativity and motivation. Unfortunately they had no music, but was beacuse they didn't had the right

people for that yet.

We wish them lot's of luck.

(see the colophon)

In the year 2004 happened lots of things as well on the area of Software as on Hardware.

Further we give now Rob Hiep of the MSX Group : "Sunrise", the ability to tell is report about last year and about what's all coming up to us in this year named 2005.

At the start of the year 2005

The year 2004 has brought us many new games small and large ones
In Spain Eduardo held a contest which lead to the development of games that needs very little memory to play and specific based on the MSX-1.

It appears that MSX-1 computer still a computer that can give many pleasure. If well programmed you play the games MSX-2 as well.

Personally I liked Duck Hunt, a game that can handle a Sega laser gun working with an adaptor on MSX. Really great. Bombaman is the success-story of the Netherlands.

Team Bomba deserves all the credits. This we can say with out hesitation 155 people bought the game .

At Oss we will demonstrate the working of two usb-reader working together to play Konami games.

So please visit our booth.

The plans for 2005

Priority on the list is the USB-reader. Furthermore we gonna extend our assortment with new Moonsounds equipped with 640 Kb Sram ,Meridian and Mbwave 1.16. You can count on the end of April as date of availability.

The price will be the same as we asked previously for the 128 Kb Sram version. So, it has become cheaper.

The restart of Realms of Adventure will most likely happen and will be the biggest RPG-game ever.

The requirements will be further 256 Kb as main memory ,a Moonsound is a must but we do not forget the users of the Fmpac. Naturally we continue with the delivery of brand new games and the Ide's in all it variants.

Hopefully it will also bring games for the GFX9000 ,,

Rob Hiep

After 13 years brings Delta Soft
the continue out on Konami Quiz,

KONAMI QUIZ 2

the last cartridges
